Greenspiration

Our Lady of Mercy School Rio de Janeiro

High School Green Team

- A group of High School students passionate about making a change in OLM
- Theme: Greenspiration
 - Inspired by GIN → we want to inspire others

Meatless
Mondays

"Meatless Monday is a global movement with a simple message: one day a week, cut the meat."

For more information: www.meatlessmondays.com

Why Meatless Mondays?

Health Benefits

- Rich in fiber, vitamins and other nutrients
- Reduces the risk of cancer, heart disease, diabetes, and obesity

Water Crisis

 Livestock requires much more water to raise than fruits and vegetables

Global Warming

 Meat industry accounts for nearly one-fifth of human-made greenhouse gas emissions

Deforestation

 Most tropical rainforests are being deforested to open land for raising stock

Meatless Mondays at OLM!

- School nutritionist special menu on Mondays with vegetarian options
- **School campaign** posters around school cafeteria and lectures with classes

Meatless Mondays at OLM!

On Mondays, choose the vegetarian option and help make a difference!

FOOD WASTE

Food Waste and Food Loss

Food Loss Index (FLI) & Food Waste Index (FWI)

Food wasted or lost annually, representing $\frac{1}{3}$ of world's food (FAO ,2011)

\$750 billion dollars

Wasted by producers in food wastage

Of greenhouse gases, making food wastage the 3rd top GHG emitter

870 million people

Go hungry everyday

Environmental Effects

Wastes Water

Millions of gallons of water used to plant, grow, or produce food goes to waste

Releases Methane

Food that ends up in landfills decompose, releasing the greenhouse gas

Wastes Oil and Land

When food is wasted, the fuel and land used in food production or transportation go with it

Harms Biodiversity

Deforestation and marine fisheries exploit natural habitats

Awareness Campaign

- Green day
- Gymkhana at school spirit week
- Posters and signs to prevent food waste

Gymkhana Results

	Gymkhana	Food Waste	(kg)			
Grade	9th	10th	11th	12th	Total	
Sep. 30 - Oct. 03	0.81 kg	1.22 kg	0.6 kg	0.5 kg	2.13 kg	

	Food Waste	(kg)					
Date	Monday	Tuesday	Wednesday	Thursday	Total		
Nov. 04 - 07	2.1 kg	2.7 kg	3 kg	2 kg	9.8 kg		

HIGH SCHOOL GREEN TEAM

The Bee Change Project

Bee the change you want to see in the world

Importance of Bees

- 71/100 crop species depend on the pollination of bees
 - These crop species provide 90% of food worldwide
- 1/3 bites of food depend on pollinators (bees)
- Bee pollination is worth between \$37 billion and \$97 billion

The Problem

POPULATION DECLINE

COLONY COLLAPSE DISORDER

CAUSES OF THE DECLINE OF BEE POPULATIONS

Agricultural pesticides

Harmful parasites, like mites

Rising CO2

Habitat loss

Stress Bees experience

🐐 Inadequate forage

Consequences

OF POPULATION DECLINE

Consequences

Since 2010: loss of 37.8% US colonies each year

Risk of extinction

Extinction rates are 100to 1000 times higherthan normal

LONG-TERM

→ Without bees:

- Consequences 6 87 of the world's food crops would be affected
 - US honeybees: contribute \$15 Bi
 - Food could become more expensive or disappear
 - Crops would lose quality
 - Dairy, coffee, cotton, almonds

What can we do to help?

PRESERVATION MEASURES

Preservation

HOW CAN YOU HELP?

• Reduce the use of insecticides

Role of Citizens and Companies

Stop pesticide use

Monitor the Varroa mite

Care for the environment

Support local gardeners

Plant a bee garden!

Plant flowers that attract bees

Use natural herbicides and fertilizers

Set up a water source for bees: bowl of water with wine corks for them to land

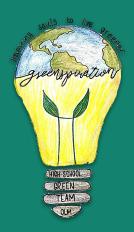

Recycled can + hollow twigs: DIY house for bees

- Raise awareness on the decline of bee populations
- Finspire students to make a change
 - o Green Day
- Finstall preservation measures in OLM
 - o Planting flowers

Actions
